

Check List for New Water Connection

(without curb box)

1. To purchase Service Connection permit, you will need the following:
 - A. Copy of plumbing/water service permit from Greg Younk
 - B. Copy of legal description of the property & parcel code number
 - C. Information on building(s) to be connected (line length/list of fixtures)
 - D. Payment

Refer to page 1 Steps to Getting New Water Service in booklet
2. Home owner or their contractor installs their portion of service line. Must follow Water District #1 specifications (service pipe, size determined by Water District #1, must be either Type K copper or polyethylene which is minimum of 160 psi, ASTM S 2239 (SIDR7 must be marked on tubing)).

Refer to pages 2 and 3 Install Water Service Line in booklet for complete list of specifications
3. Inspection of outside service line. (Contact Greg Younk for inspection). Water District #1 will need copy of outside inspection report before scheduled for connection. **Refer to page 3 Outside Service Line Inspection and Hook-up/Tap in booklet for complete details**
4. Complete inside plumbing connections.
Wells need to be disconnected before inspection. All brass materials from service line to the top valve shall be mechanical joints only. **Refer to page 3 Installing Meter Yoke in booklet for complete details.**
5. Inside Inspection. (Contact Greg Younk for inspection)
Refer to page 4 Inside Inspection in booklet for complete details.
6. Meter Installation and Water Turn On. Water District #1 MUST have the approval report in order to schedule a meter set. **Refer to page 4 Meter Installation and Water Turn On for complete details**
