

Check List for New Water Connection

(with curb box)

1. To purchase Service Connection permit, you will need the following:
 - A. Owner Acknowledgement & Agreement from township
 - B. Plumbing/water service permit from Township Code Authority
 - C. Tax ID number
 - D. Information on building(s) to be connected (line length/list of fixtures)
 - E. Payment

Refer to page 1 Steps to getting new water service in booklet
2. Home owner or their contractor installs their portion of service line. Must follow Water District #1 specifications (service pipe, size determined by Water District #1, must be either Type K copper or polyethylene which is minimum of 160 psi, ASTM S 2239 (SIDR7 must be marked on tubing). **Refer to page 2 and 3 Install water service line for complete list of specifications.**
3. Inspection of outside service line/curb box connection. (Contact Township Code Authority for inspection)
Refer to page 3 outside service line inspection for complete details
4. Complete inside plumbing connections.
Wells need to be disconnected before inspection. All brass materials from service line to the top valve shall be mechanical joints only. **Refer to page 3 Installing Meter Yoke. Location and Installation for complete details in booklet**
5. Call Water District #1 to set up inside inspection/meter set.
Refer to pages 3 and 4 for complete details in booklet
